

My research focuses during my PhD

Female representation in national cabinets after civil wars

Scraping and predicting to generate a new dataset with around 100,000 observations

Autocratic cooperation

Network analysis to identify cooperation clusters

Directed criticism at the
international level

NLP (sentiment analysis) to identify
directed criticism

My research focus during my PhD

Female representation in national cabinets after civil wars

Scraping and **predicting** to generate a new dataset with around 100,000 observations

Autocratic cooperation

Network analysis to identify cooperation clusters

Directed criticism at the international level

NLP (sentiment analysis) to identify directed criticism

How I transitioned from conflict studies to data science
